

MIND PRIZE

“Maximizing Innovation in Neuroscience Discovery”

An initiative from The Pershing Square Foundation

2024 Application Guidelines

PRIZE OVERVIEW

The Pershing Square Foundation’s (PSF) brain initiative funds cutting-edge research that revolutionizes our ability to predict, prevent, and treat neurodegenerative diseases (NDDs). Advancing our fundamental understanding of the brain and cognition to ultimately combat neurodegeneration and related diseases is a goal of increasing urgency. Breakthroughs in basic scientific and translational research will yield critical tools for and knowledge of NDDs, including Alzheimer’s Disease and Dementia, which affect millions of people worldwide.

The MIND (Maximizing Innovation in Neuroscience Discovery) Prize supports and empowers early-to-mid-career investigators to rethink conventional paradigms around NDDs. Modeled after the Pershing Square Sohn Prize for Young Investigators in Cancer Research, the MIND Prize catalyzes interdisciplinary approaches and facilitate collaborations across academic departments and institutions. It fuels the groundbreaking research that will accelerate our understanding of NDDs at every level.

Projects may range from the invention of novel tools, techniques, and technologies for mapping and analyzing the brain to bold approaches that demonstrate extraordinary therapeutic potential. Research domains may include—but are not limited to—neurobiology, brain imaging and mapping, machine learning, drug delivery, and synthetic biology.

MIND Prize winners will each receive \$250,000/year for three years, and they become part of a unique network of researchers associated with PSF. Generally, five to seven prizes will be awarded annually. Benefits include:

- Facilitated partnerships with like-minded researchers within and across institutions
- Networking programs such as collaborations and discussions with industry mentors, introductions to philanthropic and for-profit investors in the business community, special industry networking and entrepreneurship events, and more
- An annual retreat
- Opportunities to present at conferences and events (hosted by PSF and other organizations)

APPLICATION PROCESS

The application process will be conducted in two stages:

Stage 1: Letter of Intent (LOI) and Budget – Opens on **Monday, October 9th, 2023** to all who meet the eligibility criteria.

Stage 2: Presentation – Finalists will be invited to present their proposal to the Scientific Board at the 2024 MIND Prize Review Board Meeting in Manhattan, New York (a remote option will be available, if necessary, but in-person is preferred) on **Wednesday, February 21st, 2024**.

TIMELINE AND KEY DATES

Please note that PSF may adjust the notification dates without notice to applicants:

October 9, 2023:	Application opens to receive Letters of Intent (LOI)
November 13, 2023:	Deadline to submit LOI
Early February 2024:	Selected applicants invited to present at finalist Review Board Meeting
February 21, 2024:	MIND Prize Review Board Meeting at PSF Offices in NYC
Late February 2024:	2024 MIND Prize winners notified
May 2024:	Projects start
June 5, 2024	MIND Prize Award Dinner

CRITERIA

Radical innovation: PSF seeks high-risk, high-reward proposals that focus on novel interdisciplinary approaches to neuroscience research and are grounded in sound reasoning from first principles. The MIND Prize was created to fund projects that have been deemed too risky or speculative for traditional funding sources but still hold the potential for radical impact. Investigators with or without core neuroscience backgrounds are encouraged to apply. We are committed to supporting scientists whose imagination and fresh insights could substantially change an area of research by applying their expertise to new directions.

Scientific excellence: The scientific merit of proposals will be determined by peer review by the Scientific Review Board.

Quality of the applicant: Applicants must display creativity, adaptability, strong written communication skills, and the ability to collaborate with others. They embody an entrepreneurial spirit for driving impact and scale.

Application to neurodegeneration: Proposals that articulate a clear application to neurodegenerative and neurocognitive disorders, with a lens of Alzheimer's Disease and Dementias, will be favored.

ELIGIBILITY

An MD, PhD, or MD-PhD degree (or equivalent) is required. Applicants must have completed at least one (1) but no more than ten years of independent research experience as a tenure-track faculty member by the start date of the Prize (May 2024). Principal Investigators (PIs) must hold faculty appointments at academic research institutions in the United States of America. Multiple applicants from the same institution may apply as long as eligibility criteria are met. An applicant, who is not a U.S. citizen or permanent resident, by submitting an application for this funding, assures that his/her visa status will provide sufficient time to complete the project and grant term within the United States. Investigators need not be specifically trained in neuroscience; however, they should have access to an environment capable of conducting high-quality, high-impact research related to the understanding of the human brain and/or cognition, with a lens on Alzheimer's Disease and Dementias. The Pershing Square Foundation does not discriminate on the basis of race, color, national origin, age, disability, or sex.

LETTER OF INTENT (LOI)

LOIs are due **Monday, November 13th, 2023 by 5pm EST**. The LOI is a **two-page** document in Georgia, 11-point font, single-spaced, with one-half inch (.05) margins that answers the following questions: **What do you think is missing in this field and what is your proposal to fill that gap? Why you, and why is this a project worth funding?** Figures are accepted but must remain legible within the two-page limit. References are not included in the limit.

The LOI must include the following elements:

1. A description of the applicant's scientific accomplishments to date;
2. A description of the proposed research project –must include scientific background, aims, and research plan;
3. A description of why the project is innovative within the specific research focus area;
4. A description of how the MIND Prize funding will help your research contribute to the field.

A **budget** and a **biosketch** (slightly different from NIH format, using our own template) will be required along with the LOI. Templates for both will be provided, and applicants must use these templates. Templates and the link to submission form can be found on our application portal: <https://prizeapplication.smapply.io/>. The total budget per year must reach but should not exceed \$250,000 (this includes direct and indirect costs). The budget should be constructed as follows:

	Year 1	Year 2	Year 3	Total
Total Direct Costs	\$225,000	\$225,000	\$225,000	\$675,000
Indirect Costs (10%)	\$25,000	\$25,000	\$25,000	\$75,000
TOTAL (Direct & Indirect)	\$250,000	\$250,000	\$250,000	\$750,000

REVIEW MECHANISMS

- After submission of the LOI, applications will undergo review by the [Scientific Advisory Board](#).
- Applicants will be selected from a group of qualified individuals based on their credentials, the merits of their proposals, and the connection of their proposals to the goals of The Pershing Square Foundation's MIND Prize.
- Finalists will be invited to present their proposal at the 2024 Review Board Meeting, to be held on Wednesday, February 21st, 2024. A virtual option would be available, although in-person attendance is preferred, and travel expenses will be reimbursed.
- The final selection will be contingent upon ratification by the Trustees of PSF.
- PSF will not provide reviewer critiques or evaluations to applicants.

PRIZE ADMINISTRATION

Award Agreement

Upon acceptance of the MIND Prize, the PI and their employing institution will be required to sign an award agreement indicating acceptance of the PSF Terms and Conditions. Among other requirements, PSF must be notified in advance and approve of any significant changes in research objectives, key personnel, or budget and must be acknowledged in related publications.

Publicity

By submitting an application for funding, the PI grants PSSCRA permission to use their name, image, likeness and quotes at any time in connection with the publicity relating to this Award (whether during the Award period or after) provided that such use is factual, accurate and for non-commercial purposes only. PSSCRA will coordinate with the appropriate individuals with the employing institution for use of institution name. (Further publicity terms related to the PI's institution will be outlined in the award agreement and will be agreed to upon agreement execution.)

Funding

PSF will allow no more than 10% of the award amount (\$25,000/year) to be allocated to indirect costs. Full term funding will be contingent upon review of annual progress reports and other oversight activities conducted by PSF. PSF will determine future funding at its sole discretion. Multi-year support is not automatic and is conditioned on meeting certain milestones and deliverables defined in the Award Agreement, including submission of complete and accurate progress reports indicating that the project is meeting measurable objectives.

Annual Retreat

Prize winners, academic and industry leaders, Scientific Advisory Board members, and select guests will be invited to attend an annual scientific retreat.

Reporting Requirements

All projects are required to provide an annual written progress report in accordance with applicable IRS requirements. The reports will be reviewed to ensure that the purposes of the grants are being fulfilled. A template and reminder will be sent in advance of the deadline. The procedures outlined above are in accordance with the procedure for making grants to 501(c)(3) nonprofit organizations approved by the IRS for The Pershing Square Foundation.
